Piyush Sharma

piyush.sharma2024@nst.rishihood.edu.in | LinkedIn: piyush-sharma | GitHub: Piyush-13090 | Portfolio

OBJECTIVE

Data Analyst and Data Visualization enthusiast with hands-on experience building interactive dashboards, KPI reporting systems, exploratory business analytics workflows, and decision-support visualizations using Python, SQL, Excel, and BI-driven analytical methods. Skilled in transforming raw operational datasets into actionable insights through trend analysis, segmentation, metric engineering, and executive-ready dashboard storytelling.

EDUCATION

Bachelor of Technology in Artificial Intelligence — Newton School of Technology, Rishihood University (2024 – 2028)

TECHNICAL SKILLS

Languages/Database: Python, SQL, JavaScript, TypeScript, MySQL, MongoDB, PostgreSQL
Data Analysis: Pandas, NumPy, Excel, Data Cleaning, Exploratory Data Analysis (EDA), Data Preprocessing
Visualization: Matplotlib, Seaborn, Tableau, Dashboard Design, Business Reporting, Analytical Storytelling
Web Technologies: HTML, CSS, React.js, Node.js, Express.js, REST APIs
Software & Tools: Git, GitHub, Postman, Docker, Prisma ORM, VS Code
Concepts: Data Visualization, Statistical Trend Analysis, Segmentation Analysis, Dashboard Analytics, Data-Driven Decision Making

PROJECTS

HR Analytics Dashboard | *Tableau, Excel, Data Visualization* GitHub 2026

- Built an interactive HR analytics dashboard to evaluate employee attrition, workforce distribution, performance trends, and departmental dynamics.
- Cleaned and transformed datasets to extract key metrics including attrition rate, job satisfaction index, and role-wise retention patterns.
- Engineered KPIs such as department-wise attrition, experience vs performance correlation, and salary distribution insights.
- Designed visualizations and filters to enable data-driven decision making for workforce optimization.

NYC Airbnb Booking Analytics Dashboard | *Python, Pandas, Tableau, Data Visualization* GitHub 2026

- Built an end-to-end analytics pipeline on NYC Airbnb datasets to analyze listing performance, pricing behavior, and occupancy trends.
- Cleaned, transformed, and aggregated multi-column booking data using Python ETL workflows; performed hypothesis testing and regression analysis.
- Engineered metrics including estimated revenue, occupancy rate, price tier segmentation, and neighborhood demand indicators.
- Developed Tableau dashboards covering Market Overview, Pricing Intelligence, and Guest Experience for actionable business intelligence.

CERTIFICATIONS

Data Analytics & Visualization Certification 2025

Accenture North America – Virtual Experience Program

- Performed data cleaning, modeling, and analysis on multiple datasets to identify content trends.
- Developed visualizations and presented insights for data-driven decision-making.
- Simulated real-world client workflows through structured presentation.
- Skills: Data Cleaning, Data Modeling, Data Analysis, Data Visualization, Data Storytelling
